

## PRELIMINARY SUMMARY OF MAP ACTIONS

**You are receiving this notice because a property you own is shown to have an effective Letter of Map Change (LOMC) that may no longer be in effect when the new map panels become effective.**

On May 13, 2022, The Federal Emergency Management Agency (FEMA) released preliminary Flood Insurance Rate Maps (FIRMs) and an accompanying Flood Insurance Study (FIS) report showing updated flood hazard determinations for portions of Burleigh County, including the City of Bismarck.

As part of the map update process, FEMA has re-evaluated each LOMC to determine if it should remain in effect based on the changes to flood zones and Base Flood Elevations on the preliminary FIRMs. FEMA has provided our community with the preliminary results of their evaluation called a Summary of Map Actions (SOMA). The SOMA provides a comprehensive list of previously issued LOMC for our community.

Preliminary SOMA documents for Burleigh County and The City of Bismarck are viewable at: <https://www.bismarcknd.gov/2099/Burleigh-County-Flood-Insurance-Rate-Map> or use the following

We encourage you to contact your insurance agent to learn about your flood insurance options and if flood insurance will be required for your property after the preliminary products become effective. There may be cost-saving options available for insurance which may need to be in place before the maps become effective.
